# ABOUT US

## Our Scientific DNA

- **Expertise:** Leading in pharmaceutical innovation.
- **Passion:** Committed to global health.
- **Research:** Cutting-edge medical solutions.
- **Quality:** Perfecting molecules with top-grade ingredients.
- **Innovation:** Constantly enhancing efficacy.
- **Reach:** Global distribution network

## Mission: Beyond Borders

- **Precision:** Delivering high-quality, GMP-certified products.
- **Trust:** Ensuring third-party tested purity and verified results.
- **Impact:** Making a difference in patients' lives.

# Injectables

---

This category encompasses pharmaceutical products that are administered via injection. These products include a wide range of anabolic steroids, hormones, and other compounds designed to enhance muscle growth, improve athletic performance, or treat specific medical conditions. Injectable formulations can provide rapid absorption and effects, making them popular among athletes, bodybuilders, and patients requiring hormone replacement or therapeutic interventions. The injectables are typically categorized by their active ingredients, which may include testosterone derivatives, anabolic steroids, and other specialized compounds tailored for various purposes.

01

# Testosterone

Products that contain testosterone, a key hormone responsible for male development and various physiological functions.

**3ELIGAS**+

## Etho® Testosterone

SKU: INJ-TE300-10M (300 mg/mL)  
INJ-TE450-10M (450 mg/mL)

- 10 mL Multi-Dose Vial
- Oil: MCT Oil
- Active Half-Life: 7-10 days

### Benefits:

- Promotes muscle growth and strength.
- Rapid muscle growth and strength gains.

### Instructions:

- Inject 1-2 times per week for steady hormone levels.
- Recommended cycle length: 8-12 weeks.
- Follow with proper Post Cycle Therapy (PCT).

**3ELIGAS**+

## Cypo® Testosterone

SKU: INJ-TC250-10M (250 mg/mL)  
INJ-TC200-10M (200 mg/mL)

- 10 mL Multi-Dose Vial
- Oil: MCT Oil
- Active Half-Life: 8-12 days

### Benefits:

- Increases muscle mass.
- Enhances recovery.

Instructions: Administer via intramuscular injection. Typical dosage is 200-400 mg per week, divided into 1-2 injections.

## Propha® Testosterone

SKU: INJ-TP100-10M (100 mg/mL)  
 INJ-TP150-10M (150 mg/mL)

- 10 mL Multi-Dose Vial
- Oil: MCT Oil
- Active Half-Life : 8 hours

### Benefits:

- Rapid increases in muscle mass.
- Promotes muscle growth.

Instructions: Administer via intramuscular injection. Typical dosage is 300-600 mg per week, divided into 2-3 injections.

## Test® Suspension

SKU: INJ-TS100-10M

- 10 mL Multi-Dose Vial
- Testosterone Suspension
- 100 mg/mL
- Oil: MCT Oil
- Active Half-Life: 1 day

### Benefits:

- Immediate muscle gains.
- Increases strength quickly.
- Enhances endurance.
- Supports recovery.

Instructions: Administer via intramuscular injection. Typical dosage is 50-100 mg every other day.

## DHB 1® -Test Cyp

SKU: INJ-DHB100-10M

- 10 mL Multi-Dose Vial
- Dihydroboldenone Cypionate
- 100 mg/mL
- Oil: MCT Oil
- Active Half-Life: 8 days

### Benefits:

- Promotes lean muscle growth.
- Reduces fat levels.
- Enhances vascularity.
- Supports recovery.

Instructions: Administer via intramuscular injection. Typical dosage is 200-400 mg per week, divided into 1-2 injections.

**3ELIGAS**+

## Suste® Testosterone

SKU: INJ-TPP30-10M (250 mg/mL)

INJ-TPP60-10M (500 mg/mL)

- 10 mL Multi-Dose Vial
- Oil: MCT Oil
- Active Half-Life : 15 days

### Benefits:

- Supports muscle mass and strength.
- Strengthens muscles.

Instructions: Administer via intramuscular injection. Typical dosage is 250-500 mg per week, divided into 1-2 injections.

**3ELIGAS**+

## Tri Testosterone® Pro 400

SKU: INJ-TCD100-10M

- 10 mL Multi-Dose Vial
- Testosterone Cypionate (100mg), Testosterone Decanoate (200mg), Testosterone Enanthate (100mg)
- 400 mg/mL
- Oil: MCT Oil
- Active Half-Life: 15 days

### Benefits:

- Promotes significant muscle gains.
- Enhances strength and endurance.
- Provides stable testosterone levels.
- Supports overall recovery.

Instructions: Administer via intramuscular injection. Typical dosage is 400-800 mg per week, divided into 1-2 injections.

**3ELIGAS**+

## Tri Testosterone® Lite 350

SKU: INJ-TEC100-10M

- 10 mL Multi-Dose Vial
- Testosterone enanthate 200mg, Testosterone Cypionate 100mg, Testosterone Propionate 50mg
- 350 mg/mL
- Oil: MCT Oil
- Active Half-Life: 8-12 days

### Benefits:

- Rapid strength and weight gain.
- less water retention.
- Reduces recovery time.
- Enhances overall performance.

Instructions: Administer via intramuscular injection. Typical dosage is 350-1000 mg per week, divided into 1-2 injections.

**3ELIGAS**+

## Supra Test 250<sup>®</sup>

SKU: INJ-TE250NE0-10M

- 10 mL Multi-Dose Vial
- Testosterone Enanthate (no EO)
- 250 mg/mL
- Oil: MCT Oil
- Active Half-Life: 8–12 days

### Benefits:

- Smooth release
- Ideal for beginners
- reduced irritation.

Instructions: 250–500 mg/week, 1–2 injections weekly , Cycle: 12–16 weeks, PCT required.

**3ELIGAS**+

## Supra Test 300<sup>®</sup>

SKU: INJ-TE300E0-10M

- 10 mL Multi-Dose Vial
- Testosterone Enanthate (with EO)
- 300 mg/mL
- Oil: MCT Oil
- Active Half-Life: 7-8 DAYS

### Benefits:

- High concentration.
- Faster absorption.
- Advanced bulking

Instructions: Administer via intramuscular injection. Typical dosage is 300-600 mg per week, divided into 1-2 injections.

**3ELIGAS**+

## Supra<sup>®</sup> Testosterone 400

SKU: INJ-SP400-10M

- 10 mL Multi-Dose Vial
- Testosterone Phenylpropionate: 120mg,
- Testosterone Isocaproate: 120mg,
- Testosterone Decanoate: 100mg,
- Testosterone Propionate: 60mg
- 400 mg/mL
- Oil: MCT Oil
- Active Half-Life: 15 days

### Benefits:

- Promotes muscle growth and strength.
- Rapid muscle growth and strength gains.

### Instructions:

- Inject 1–2 times per week for steady hormone levels.
- Recommended cycle length: 8–12 weeks.
- Follow with proper Post Cycle Therapy (PCT).

# Nandrolone

Nandrolone is a popular anabolic steroid known for its ability to promote muscle growth, improve recovery, and enhance joint health. It is commonly used in bulking cycles due to its mild androgenic effects and ability to increase red blood cell production. Nandrolone derivatives like Deca Durabolin and NPP (Nandrolone Phenylpropionate) offer varying release rates and durations.

## Deca<sup>®</sup> Durabolin

SKU: INJ-ND300-10M (300 mg/mL)

INJ-ND500-10M (500 mg/mL)

- 10 mL Multi-Dose Vial
- Oil: MCT Oil
- Active Half-Life: 10–14 days

### Instructions:

- Inject 1–2 times per week.
- Recommended cycle length: 10–14 weeks.
- Follow with proper PCT.
- Duration: as directed by your healthcare professional

### Benefits:

- Promotes muscle growth and strength.
- Ideal for advanced cycles.

## Pheno<sup>®</sup> NPP

SKU: INJ-NPP100-10M (100 mg/mL)

INJ-NPP150-10M (150 mg/mL)

- 10 mL Multi-Dose Vial
- Oil: MCT Oil
- Active Half-Life: 7–10 days

### Instructions:

- 1–2 injections weekly.
- Recommended cycle length: 12–16 weeks
- PCT required.
- Duration: as directed by your healthcare professional

### Benefits:

- Rapid muscle growth and recovery.
- High potency for cutting/bulking.

# Trenbolone

Trenbolone is a powerful anabolic steroid known for its ability to promote muscle growth, enhance strength, and improve overall performance. It is commonly used by experienced athletes and bodybuilders during cutting and bulking cycles. Trenbolone derivatives like Trenbolone Acetate, Enanthate, and Hexahydrobenzylcarbonate offer different release rates and durations.

3ELIGAS

## Hexo® Trenbolone

SKU: INJ-TH100-10M

- 10 mL Multi-Dose Vial
- Trenbolone Hexahydrobenzylcarbonate (100mg/mL)
- 100-400 mg/week
- Oil: MCT Oil
- Active Half-Life: 10-14 days

### Benefits:

- Promotes muscle growth and strength.
- Enhances overall performance and endurance.
- Ideal for experienced users.

### Instructions:

- Inject 1-2 times per week.
- Recommended cycle length: 8-12 weeks.
- Follow with proper PCT.

3ELIGAS

## Etho® Trenbolone

SKU: INJ-TE200-10M

- 10 mL Multi-Dose Vial
- Trenbolone Enanthate (200mg/mL)
- 200-800 mg/week
- Oil: MCT Oil
- Active Half-Life: 10-14 days

### Benefits:

- Rapid muscle growth and strength gains.
- Enhanced recovery and performance.
- Ideal for long cycles.

### Instructions:

- Inject 1-2 times per week.
- Recommended cycle length: 8-12 weeks.
- Follow with proper PCT.

3ELIGAS

## Acro® Trenbolone

SKU: TRN-ACRO100-10M

- 10 mL Multi-Dose Vial
- Trenbolone Acetate (100mg/mL)
- 100-400 mg/week
- Oil: MCT Oil
- Active Half-Life: 3-5 days

### Benefits:

- Rapid muscle growth and performance enhancement.
- Ideal for cutting and bulking cycles.
- Minimal water retention.

### Instructions:

- Inject 2-3 times per week.
- Recommended cycle length: 8-10 weeks.
- Follow with proper PCT.

3ELIGAS

## Tri Trenbolone® 150

SKU: INJ-THA50-10M

- 10 mL Multi-Dose Vial
- Tren Ace 50mg, Tren Enth 50mg, Tren Hex 50mg
- 150-450 mg/week
- Oil: MCT Oil
- Active Half-Life: 7-10 days

### Benefits:

- Multi-ester synergy.
- versatile for bulking/cutting.

### Instructions:

- 2-3 injections weekly.
- Recommended cycle length: 8-10 weeks
- PCT required.

# Drostanolone

Drostanolone, also known as Masteron, is an anabolic steroid used primarily for its cutting and performance-enhancing properties. It helps to increase muscle hardness and density while reducing body fat. Drostanolone derivatives like Drostanolone Propionate and Enanthate provide different release rates and durations.

**3ELIGAS**+

## Etho<sup>®</sup> Masteron

SKU: INJ-DE200-10M

- 10 mL Multi-Dose Vial
- Drostanolone Enanthate (200mg/mL)
- 200–600 mg/week
- Oil: MCT Oil
- Active Half-Life: 10–14 days

### Benefits:

- Increases muscle hardness and density.
- Enhances fat loss and overall aesthetics.
- Ideal for cutting cycles.

### Instructions:

- Inject 1–2 times per week.
- Recommended cycle length: 8–12 weeks.
- Follow with proper PCT.

**3ELIGAS**+

## Propha<sup>®</sup> Masteron

SKU: INJ-DP100-10M

- 10 mL Multi-Dose Vial
- Drostanolone Propionate (100mg/mL)
- 100–400 mg/week
- Oil: MCT Oil
- Active Half-Life: 2–3 days

### Benefits:

- Rapid increases in muscle hardness and density.
- Enhanced fat loss and aesthetics.
- Ideal for short cutting cycles.

### Instructions:

- Inject 2–3 times per week.
- Recommended cycle length: 8–10 weeks.
- Follow with proper PCT.

# Boldenone

Boldenone, also known as Equipoise, is an anabolic steroid that promotes muscle growth, improves strength, and enhances appetite. It is commonly used in bulking cycles due to its ability to increase lean muscle mass with minimal water retention. Boldenone Undecylenate is the most common form, known for its long-lasting effects.

**3ELIGAS**+

## Quant® Equipoise

SKU: INJ-BU300-10M (300 mg/mL)  
INJ-BU500-10M (500 mg/mL)

- 10 mL Multi-Dose Vial
- Oil: MCT Oil
- Active Half-Life: 10-14 days

### Benefits:

- Promotes lean muscle growth.
- Significant growth.

### Instructions:

- Inject 1-2 times per week.
- Recommended cycle length: 10-12 weeks.
- Follow with proper PCT.

# Methenolone

Methenolone, also known as Primobolan, is an anabolic steroid prized for its mild androgenic effects and minimal side effects. It is commonly used during cutting cycles to preserve lean muscle mass and enhance muscle definition. Methenolone Enanthate is the most common form, known for its long-lasting effects.

**BELIGAS**+

## Etho<sup>®</sup> Primobolan

SKU: INJ-ME100-10M (100 mg/mL)  
INJ-ME200-10M (200 mg/mL)

- 10 mL Multi-Dose Vial
- Oil: MCT Oil
- Active Half-Life: 5 days

### Benefits:

- Preserves lean muscle mass.
- Enhances muscle definition.

### Instructions:

- Inject 1-2 times per week.
- Recommended cycle length: 8-12 weeks.
- Follow with proper PCT.

# Blends

Blend injectables combine multiple anabolic steroids to offer synergistic effects for muscle growth, strength, and performance. These formulations are designed to provide a balanced mix of benefits from each component, making them popular for comprehensive cycle plans.

## Helio Clen® Yohimbine

SKU: INJ-CY400-10M

- 10 mL Multi-Dose Vial
- Clenbuterol & Yohimbine
- 40 mcg Blend, 5.5 mg/mL
- Oil: MCT Oil
- Active Half-Life: 6 hours

### Instructions:

- Dosage and cycle length depend on individual tolerance and goals.
- Consult a healthcare professional for personalized recommendations.

### Benefits:

- Enhances fat loss.
- Increases energy and endurance.
- Supports overall performance.

## Tren-Test-Mast®-Short 150

SKU: INJ-TTP50-10M

- 10 mL Multi-Dose Vial
- Trenbolone Acetate (50mg), Testosterone Propionate (50mg), Drostanolone Propionate (50mg)
- 150 mg/mL
- Oil: MCT Oil
- Active Half-Life: 2-3 days

### Instructions:

- Inject 2-3 times per week.
- Recommended cycle length: 8-10 weeks.
- Follow with proper PCT.

### Benefits:

- Promotes rapid muscle growth.
- Enhances muscle definition.
- Ideal for short cutting cycles.

## Tren-Test-Mast® Long 300

SKU: INJ-TTE100-10M

- 10 mL Multi-Dose Vial
- Trenbolone Enanthate (100mg), Testosterone Enanthate (100mg), Drostanolone Enanthate (100mg)
- 300 mg/mL
- Oil: MCT Oil
- Active Half-Life: 5 days

### Instructions:

- Inject 1-2 times per week.
- Recommended cycle length: 8-12 weeks.
- Follow with proper PCT.

### Benefits:

- Promotes sustained muscle growth.
- Enhances muscle definition.
- Ideal for long cycles.

## Testosterone Trenbolone® Long 300

SKU: INJ-TTE200-10M

- 10 mL Multi-Dose Vial
- Testosterone Enanthate (200mg), Trenbolone Enanthate (100mg)
- 300 mg/mL
- Oil: MCT Oil
- Active Half-Life: 5 days

### Benefits:

- Increases muscle mass rapidly
- Enhances strength and performance
- Supports fat loss
- Reduces recovery time

Instructions: Administer via intramuscular injection. Typical dosage is 400-600mg per week, divided into 1-2 injections.

3ELIGAS+

## Testosterone NPP® Blend 150

SKU: INJ-TPP75-10M

- 10 mL Multi-Dose Vial
- Testosterone Propionate (75mg), Nandrolone Phenylpropionate (75mg)
- 150 mg/mL
- Oil: MCT Oil
- Active Half-Life: 4.5 days

### Benefits:

- Promotes lean muscle mass
- Supports strength gains
- Reduces recovery time
- Improves overall performance

Instructions: Administer via intramuscular injection. Typical dosage is 300-600mg per week, divided into 2-3 injections.

3ELIGAS+

## Testosterone® Equipoise 400

SKU: INJ-TBU200-10M

- 10 mL Multi-Dose Vial
- Testosterone Enanthate (200mg), Boldenone Undecylenate (200mg)
- 400 mg/mL
- Oil: MCT Oil
- Active Half-Life: 14 days

### Benefits:

- Increases muscle mass
- Enhances endurance
- Improves recovery
- Supports overall strength

Instructions: Administer via intramuscular injection. Typical dosage is 400-800mg per week, divided into 1-2 injections.

3ELIGAS+

## Testosterone Trenbolone® Short 150

SKU: INJ-TPA75-10M

- 10 mL Multi-Dose Vial
- Testosterone Propionate (75mg),  
Trenbolone Acetate (75mg)
- 150 mg/mL
- Oil: MCT Oil
- Active Half-Life: 2-3 days

### Benefits:

- Promotes quick muscle gains
- Enhances strength and recovery
- Improves overall athletic performance
- Supports fat loss

Instructions: Administer via intramuscular injection. Typical dosage is 300-600mg per week, divided into 2-3 injections.

## Testosterone Deca® Blend 500

SKU: INJ-TND200-10M

- 10 mL Multi-Dose Vial
- Testosterone Enanthate (300mg),  
Nandrolone Decanoate (200mg)
- 500 mg/mL
- Oil: MCT Oil
- Active Half-Life: 15 days

### Benefits:

- Increases muscle mass significantly
- Reduces joint pain
- Supports recovery and endurance
- Enhances overall performance

Instructions: Administer via intramuscular injection. Typical dosage is 400-800mg per week, divided into 1-2 injections.

## Test Tren Bold® Blend 400

SKU: INJ-TBU150-10M

- 10 mL Multi-Dose Vial
- Testosterone Enanthate (150mg),  
Boldenone Undecylenate (150mg),  
Trenbolone Enanthate (100mg)
- 400 mg/mL
- Oil: MCT Oil
- Active Half-Life: 14 days

### Benefits:

- Promotes significant muscle growth
- Enhances strength and stamina
- Supports fat loss
- Improves recovery times

Instructions: Administer via intramuscular injection. Typical dosage is 400-800mg per week, divided into 1-2 injections.

# Injectable Sarms

Injectable SARMs (Selective Androgen Receptor Modulators) are compounds designed to selectively bind to androgen receptors in muscle and bone, promoting anabolic effects similar to steroids but with fewer side effects. Injectable SARMs are popular among athletes and bodybuilders for effective performance enhancement with a better safety profile

3ELIGAS+

## Sarms® TLB-150

SKU: INJ-R150-10M

- 10 mL Multi-Dose Vial
- Rad 150
- 50 mg/mL
- Oil: MCT Oil
- Active Half-Life: 24–36 hrs

Benefits: Muscle growth, strength.

Instructions: 10–20mg/day, 8–12 weeks. PCT recommended.

3ELIGAS+

## Sarms® Ostarine

SKU: INJ-MK2866-10M

- 10 mL Multi-Dose Vial
- Mk2866
- 25 mg/mL
- Oil: MCT Oil
- Active Half-Life: 24 hrs

Benefits: Lean muscle, recovery

Instructions: 10–25mg/day, 8–12 weeks.  
Mild suppression; optional PCT.

3ELIGAS+

## Sarms® Myostatin

SKU: INJ-YK11-10M

- 10 mL Multi-Dose Vial
- YK-11
- 70 mg/mL
- Oil: MCT Oil
- Active Half-Life: 6–12 hrs

Benefits: Myostatin inhibition, muscle growth.

Instructions: 5–10mg/day, 6–8 weeks. Split doses.  
PCT required.

## Sarms® Ligandrol

SKU: INJ-LGD4033-10M

- 10 mL Multi-Dose Vial
- LGD 4033
- 25 mg/mL
- Oil: MCT Oil
- Active Half-Life: 24–36 hrs

Benefits: Rapid muscle mass gain

Instructions: 5–10mg/day, 8 weeks. PCT recommended.

## Sarms® LGD Plus

SKU: INJ-LGD3303-10M

- 10 mL Multi-Dose Vial
- LGD 3303
- 25 mg/mL
- Oil: MCT Oil
- Active Half-Life: 24–36 hrs

Benefits: Muscle growth, minimal water

Instructions: 5–10mg/day, 8 weeks. PCT recommended.

## Sarms® Ibutamoren

SKU: INJ-MK677-10M

- 10 mL Multi-Dose Vial
- MK 677
- 50 mg/mL
- Oil: MCT Oil
- Active Half-Life: 4–6 hrs

Benefits: Increased GH/IGF-1, recovery

Instructions: 10–25mg/day, 6–12+ weeks. Take before bed. No PCT needed.

## Sarms® Cardarine

SKU: INJ-GW501516-10M

- 10 mL Multi-Dose Vial
- GW 501516
- 50 mg/mL
- Oil: MCT Oil
- Active Half-Life: 16–24 hrs

Benefits: Endurance, fat oxidation

Instructions: 10–20mg/day, 8–12 weeks. No suppression; cycle breaks optional.

**3ELIGAS+**

## Sarms® Testalone

SKU: INJ-R140-10M

- 10mL
- Rad 140
- 50 mg/mL
- Oil: MCT Oil
- Active Half-Life: 20–24 hrs

Benefits: Lean mass, strength

Instructions: 10–20mg/day, 8–12 weeks.  
PCT recommended.

**3ELIGAS+**

## Sarms® -SR

SKU: INJ-SR9009-10M

- 10mL
- Sr 9009
- 64 mg/mL
- Oil: MCT Oil
- Active Half-Life: 2–3 hrs

Benefits: Endurance, fat loss

Instructions: 20–30mg/day, 6–8 weeks. Split into 3–4 doses. No PCT.

**3ELIGAS+**

## Sarms® S Plus

SKU: INJ-S23-10M

- 10mL
- S23
- 40 mg/mL
- Oil: MCT Oil
- Active Half-Life: 12–24 hrs

Benefits: Androgenic muscle hardening

Instructions: 10–20mg/day, 6–8 weeks. PCT required (high suppression).

**3ELIGAS+**

## Sarms® Acetamid

SKU: INJ-S4-10M

- 10mL
- S4
- 100 mg/mL
- Oil: MCT Oil
- Active Half-Life: 4–6 hrs

Benefits: Fat loss, vascularity

Instructions: 25–50mg/day, 6–8 weeks. Split doses. PCT optional.

# Other Injectables

The "Others" subcategory features a diverse range of injectable products that do not fall under the more specific categories. This includes unique hormones, peptides, and specialized compounds like Estradiol Valerate, Estradiol Cypionate, and Trestolone Acetate. These products are designed to address specific therapeutic or performance needs, offering distinct benefits for users seeking targeted outcomes.

3ELIGAS+

## Winstrol® -Suspension

SKU: INJ-SS50-10M

- 10 mL Multi-Dose Vial
- Stanozolol Suspension
- 50 mg/mL
- Oil: MCT Oil
- Active Half-Life: 9 hours

### Benefits:

- Promotes lean muscle gains
- Increases strength and endurance
- Reduces recovery time

Instructions: Administer via intramuscular injection. Typical dosage is 50-100mg every other day.

3ELIGAS+

## Cypo® Estradiol Cypionate

SKU: INJ-EC20-10M

- 10 mL Multi-Dose Vial
- Estradiol Cypionate
- 20 mg/mL
- Oil: MCT Oil
- Active Half-Life: Approximately 5-7 days

### Benefits:

Cypo Estradiol Cypionate is a synthetic estrogen used in hormone replacement therapy. It helps alleviate symptoms of menopause, supports bone health, and regulates menstrual cycles

Instructions: Administer via intramuscular injection as directed by a healthcare provider. Typically, injections are given every 1-2 weeks.

3ELIGAS+

## Pheno® Estradiol Valerate

SKU: INJ-EV10-10M

- 10 mL Multi-Dose Vial
- Estradiol Valerate
- 10 mg/mL
- Oil: MCT Oil
- Active Half-Life: Approximately 3-4 days

### Benefits:

Pheno Estradiol Valerate is a synthetic form of estrogen effective for hormone therapy. It aids in managing menopausal symptoms, promoting breast development, and supporting overall hormonal balance.

Instructions: Administer via intramuscular injection as prescribed by a healthcare provider. Typically, injections are given every 3-4 weeks.

**3ELIGAS+**

## Pro<sup>®</sup> Metribolone (MTR)

SKU: INJ-MT5-10M

- 10 mL Multi-Dose Vial
- Methyltrienolone
- 5 mg/mL
- Oil: MCT Oil
- Active Half-Life: 8 hours

### Benefits:

- Promotes significant muscle growth
- Enhances strength
- Reduces body fat

Instructions: Administer via intramuscular injection.  
Typical dosage is 5-10mg daily.

**3ELIGAS+**

## Etho<sup>®</sup> Anadrol

SKU: INJ-0X50-10M

- 10 mL Multi-Dose Vial
- Oxymetholone
- 50 mg/mL
- Oil: MCT Oil
- Active Half-Life: 8-9 hours

### Benefits:

- Rapid muscle gain
- Increases strength
- Enhances red blood cell production

Instructions: Administer via intramuscular injection.  
Typical dosage is 50-100mg daily.

**3ELIGAS+**

## Etho<sup>®</sup> Anavar

SKU: INJ-0A50-10M

- 10 mL Multi-Dose Vial
- Oxandrolone
- 50 mg/mL
- Oil: MCT Oil
- Active Half-Life: 9 hours

### Benefits:

- Increases muscle size
- Supports fat loss
- Enhances strength

Instructions: Administer via intramuscular injection.  
Typical dosage is 25-50mg daily.

**3ELIGAS+**

## Etho<sup>®</sup> Superdrol

SKU: INJ-MS25-10M

- 10 mL Multi-Dose Vial
- Methasterone
- 25 mg/mL
- Oil: MCT Oil
- Active Half-Life: 8 hours

### Benefits:

- Increases muscle size
- Enhances strength and power
- Supports fat loss

Instructions: Administer via intramuscular injection.  
Typical dosage is 25-50mg daily.

3ELIGAS+

## Etho<sup>®</sup> Dynabol

SKU: INJ-MD100-10M

- 10 mL Multi-Dose Vial
- Methandienone
- 100 mg/mL
- Oil: MCT Oil
- Active Half-Life: 4.5-6 hours

### Benefits:

- Significant muscle growth
- Improves strength
- Enhances recovery

Instructions: Administer via intramuscular injection.  
Typical dosage is 50-100mg daily

---

3ELIGAS+

## Acro<sup>®</sup> Trestolone (Ment)

SKU: INJ-TA50-10M

- 10 mL Multi-Dose Vial
- Trestolone Acetate
- 50 mg/mL
- Oil: MCT Oil
- Active Half-Life: 2-3 days

### Benefits:

- Rapid muscle gain
- Increases strength
- Enhances libido

Instructions: Administer via intramuscular injection. Typical dosage is 50-100mg every other day.

---

3ELIGAS+

## Etho<sup>®</sup> Trestolone Acetate

SKU: INJ-ET0-TA100-10M

- 10 mL Multi-Dose Vial
- Trestolone Acetate
- 100 mg/mL
- Oil: MCT Oil
- Active Half-Life: 3 days

### Benefits:

- Muscle mass gain
- Fat loss
- Increased strength

Instructions: 50-100 mg per week, for 6-8 weeks. PCT recommended.

---

## Pheno<sup>®</sup> hMG

SKU: INJ-HMG75-10M (75 IU)  
INJ-HMG150-10M (150 IU)

- 10 mL Multi-Dose Vial
- Oil: MCT Oil
- Active Half-Life: 24 hours

### Benefits:

- Supports ovarian function
- Supports strength gains

Instructions: Administer via subcutaneous injection. Typical dosage is based on specific fertility protocols

## PHENO L-CARNITINE<sup>®</sup>

SKU: INJ-L-CAR500-30M

- 30 mL Multi-Dose Vial
- L-Carnitine 500 mg (0.5g)
- Other Ingredients: Benzyl Benzoate, Benzyl Alcohol, Grapeseed Oil, Medium-Chain Triglycerides Oil
- Preservative-Free Formula

### Benefits:

- Supports Fat Metabolism
- Digestive Wellness

Uses: Helps optimize fat metabolism. Supports gut health and nutrient absorption.

## PHENO L-CARNITINE<sup>®</sup> + CLA

SKU: INJ-L-CAR1-PCLA2.5-30M

- 30 mL Multi-Dose Vial
- L-Carnitine 1g (1,000 mg) CLA (Conjugated Linoleic Acid) 2.5g (2,500 mg)
- Other Ingredients: Benzyl Benzoate, Benzyl Alcohol, Grapeseed Oil, Medium-Chain Triglycerides Oil
- Preservative-Free Formula

### Benefits:

- Supports Fat Metabolism
- Digestive Wellness

Uses: Helps optimize fat metabolism. Supports gut health and nutrient absorption.

## Oral Products

This category includes a range of oral tablets designed to address hormonal imbalances and enhance physical performance. It features both anabolic steroid tablets and non-steroid medications that target specific medical conditions.

# AI (Aromatase Inhibitors)

The aromatase inhibitors category includes medications and supplements designed to lower estrogen levels in the body by inhibiting the aromatase enzyme, which converts androgens into estrogens. Aromatase inhibitors are essential for individuals undergoing hormone therapy or seeking to manage estrogen levels for health or performance reasons.

3ELIGAS

## Dostinex®

SKU: 0RA-CAB05-10T (0.5 mg-10 tabs)  
0RA-CAB1-10T (1 mg-10 tabs)

- 10 tablets
- Active Half-Life: Approximately 48 hours

### Benefits:

- Reduces high levels of prolactin
- Treats conditions like infertility

Instructions: Typically 0.5 mg for beginner dose taken twice a week, dosage adjusted based on medical condition and response to treatment

3ELIGAS

## Supo Aromasin®

SKU: 0RA-EXE25-50T

- 50 tablets
- Exemestane
- 25 mg

### Benefits:

- Lowers estrogen levels effectively
- Helps prevent breast cancer recurrence
- Supports muscle retention during cutting cycles

Instructions: Take one tablet daily, preferably after a meal.

3ELIGAS

## Ram-Pramipexole®

SKU: 0RA-PPX2-50T

- 50 tablets
- Pramipexole
- 2 mg

### Benefits:

- Improves motor control in Parkinson's patients
- Reduces the symptoms of restless legs syndrome
- Enhances overall quality of life

Instructions: Take as directed by a healthcare professional, usually starting with a low dose.

## Mono-Femara®

SKU: 0RA-LTZ25-50T

- 50 tablets
- Letrozole
- 2.5 mg

### Benefits:

- Lowers estrogen levels, aiding in cancer treatment
- Supports muscle mass retention in athletes
- May improve body composition

Instructions: Take one tablet daily, as directed by a physician.

---

3ELIGAS+

## Arimidex®

SKU: 0RA-ANA1-50T

- 50 tablets
- Anastrozole
- 1 mg

### Benefits:

- Effectively reduces estrogen production
- Helps prevent breast cancer recurrence
- Supports muscle preservation during cutting phases

Instructions: Typically taken once daily, as advised by a healthcare provider.

---

3ELIGAS+

# Erectile Dysfunction (ED) Treatments

The erectile dysfunction (ED) treatments category includes medications designed to improve erectile function by enhancing blood flow to the penis. These treatments are commonly prescribed for men experiencing difficulties in achieving or maintaining an erection, helping to restore confidence and improve sexual performance.

## Retho-Cialis®

SKU: 0RA-TAD25-50T (25 mg-50 tabs)  
0RA-TAD5-100T (5 mg-100 tabs)

· Tadalafil

Benefits:

- Long-lasting effects for spontaneous sexual encounters
- Improves erectile function

Instructions: Take one tablet as needed, approximately 30 minutes before sexual activity.

**BELIGAS** 

## Hypno-Viagra®

SKU: 0RA-SIL100-50T (100 mg-50 tabs)  
0RA-SIL50-50T (50 mg-50 tabs)  
0RA-SIL50-100T (50 mg-100 tabs)

· Sildenafil

Benefits:

- Rapid onset of action, usually within 30 minutes
- Enhances overall sexual performance

Instructions: Take one tablet approximately one hour before sexual activity.

**BELIGAS** 

# Post Cycle Therapy (PCT)

Post Cycle Therapy (PCT) involves the use of medications to help restore the body's natural hormonal balance after the use of anabolic steroids or other performance-enhancing substances. These treatments aim to minimize side effects, support recovery, and maintain gains achieved during a cycle.

**3ELIGAS+**

## Raloxifene®

SKU: 0RA-RAL20-50T

- 50 tablets
- Raloxifene
- 20 mg

### Benefits:

- Blocks estrogen effects in breast tissue
- Supports bone health
- Maintains muscle gains

Instructions: Take one tablet daily.

**3ELIGAS+**

## Enclomiphene®

SKU: 0RA-ENC12.5-50T

- 50 tablets
- Enclomiphene
- 12.5 mg

### Benefits:

- Promotes natural testosterone synthesis
- Helps restore hormonal balance
- Supports recovery of libido and energy

Instructions: Take one tablet daily.

**3ELIGAS+**

## Clomid®

SKU: 0RA-CL050-50T

- 50 tablets
- Clomiphene
- 50 mg

### Benefits:

- Supports recovery of natural testosterone levels
- Reduces the risk of estrogenic side effects
- Aids in maintaining muscle mass

Instructions: Take one tablet daily.

# Sarms Oral

Oral SARMs (Selective Androgen Receptor Modulators) are a class of compounds designed to selectively target androgen receptors in muscle and bone tissues. They offer anabolic benefits similar to anabolic steroids but with fewer androgenic side effects. This makes them popular among athletes, bodybuilders, and fitness enthusiasts seeking to enhance performance, build muscle, and improve body composition.

3ELIGAS

## Sarms-Testolone<sup>®</sup>

SKU: 0RA-RAD140-50T

- 50 tablets
- Rad-140
- 15 mg

Benefits:

- Promotes lean muscle growth
- Increases strength and endurance
- Supports fat loss

Instructions: Take one tablet daily.

3ELIGAS

## Sarms-Stenabolic<sup>®</sup>

SKU: 0RA-SR9009-50T

- 50 tablets
- SR-9009
- 20 mg

Benefits:

- Increases metabolic rate
- Improves endurance and stamina
- Supports fat oxidation

Instructions: Take one tablet daily.

3ELIGAS

## Sarms-S-23<sup>®</sup>

SKU: 0RA-S23-50T

- 50 tablets
- S-23
- 20 mg

Benefits:

- Enhances muscle mass and strength
- Supports fat loss
- Minimal androgenic effects

Instructions: Take one tablet daily.

3ELIGAS+

## Sarms-Ostarine®

SKU: 0RA-MK2866-50T

- 50 tablets
- MK-2866
- 15 mg

### Benefits:

- Promotes lean muscle gain
- Aids in recovery and joint health
- Supports fat loss

Instructions: Take one tablet daily.

3ELIGAS+

## Sarms-Myostatin®

SKU: 0RA-YK11-50T

- 50 tablets
- YK-11
- 5 mg

### Benefits:

- Significantly increases muscle mass
- Enhances strength
- Supports muscle recovery

Instructions: Take one tablet daily.

3ELIGAS+

## Sarms-Ligandrol®

SKU: 0RA-LGD4033-50T

- 50 tablets
- LGD-4033
- 10 mg

### Benefits:

- Promotes significant muscle growth
- Increases strength
- Supports recovery

Instructions: Take one tablet daily.

3ELIGAS+

## Sarms-Ibutamoren®

SKU: 0RA-MK677-50T

- 50 tablets
- MK-677
- 15 mg

### Benefits:

- Increases muscle mass
- Enhances recovery
- Improves sleep quality

Instructions: Take one tablet daily.

3ELIGAS+

## Sarms-Cardarine®

SKU: 0RA-GW501516-50T

- 50 tablets
- GW-501516
- 10 mg

### Benefits:

- Improves endurance and stamina
- Supports fat loss
- Enhances cardiovascular health

Instructions: Take one tablet daily.

3ELIGAS+

## Sarms-Andarine®

SKU: 0RA-S4-50T

- 50 tablets
- S-4
- 25 mg

### Benefits:

- Promotes lean muscle gains
- Supports fat loss
- Improves visual acuity

Instructions: Take one tablet daily.

3ELIGAS+

## Sarms-ACP-105®

SKU: 0RA-ACP105-50T

- 50 tablets
- ACP-105
- 10 mg

### Benefits:

- Increases lean muscle mass
- Supports strength gains
- Minimal androgenic effects

Instructions: Take one tablet daily.

3ELIGAS+

## Sarms-Accadrine®

SKU: 0RA-AC262-50T

- 50 tablets
- Ac-262-536
- 15 mg

Benefits:

- Enhances muscle strength and size
- Aids in fat loss
- Minimal side effects

Instructions: Take one tablet daily.

3ELIGAS+

## Sarms-LGD-3033®

SKU: 0RA-LGD3033-50T

- 50 tablets
- LGD-3033
- 10 mg

Benefits:

- Promotes significant muscle gains
- Supports fat loss
- Enhances recovery

Instructions: Take one tablet daily.

3ELIGAS+

## Sarm Lean®

SKU: 0RA-GW10-50T

- 50 tablets
- CW-0742
- 10 mg

Benefits:

- Enhances fat metabolism
- Improves endurance
- Supports overall health

Instructions: Take one tablet daily.

# Anabolic Steroid Tablets

Synthetic testosterone tablets designed to enhance muscle growth and performance.

## Key Benefits:

- Boosts protein synthesis and endurance.
- Speeds up recovery.
- Reduces body fat.
- Improves muscle oxygenation.

## Considerations

### Oral Tablets

- Frequent dosing required throughout the day.
- Variable absorption may lead to inconsistent effects.

### VS

### Injections

- Less frequent dosing with more stable blood levels.

3ELIGAS+

## Winstrol-Lite®

SKU: 0RA-STZ10-100T

- 100 tablets
- Stanozolol
- 10 mg

### Benefits:

- Enhances muscle definition
- Supports strength gains
- Minimal water retention

Instructions: Take as directed, typically 1-2 tablets daily.

3ELIGAS+

## Pro-Winstrol®

SKU: 0RA-STZ20-100T (20 mg-100 tabs)

0RA-STZ50-100T (50 mg-100 tabs)

- 100 tablets
- Stanozolol

### Benefits:

- Promotes lean muscle mass
- Supports fat loss

Instructions: Take as directed, typically 1 tablet daily.

3ELIGAS+

## Pro-Dynabol®

SKU: 0RA-MD20-100T (20 mg-100 tabs)

0RA-MD50-100T (50 mg-100 tabs)

- 100 tablets
- Methandienone

### Benefits:

- Supports muscle mass increase
- Increases strength and endurance

Instructions: Take as directed, typically 1-2 tablets daily.

**3ELIGAS+**

## Dynabol-Lite®

SKU: 0RA-MD10-100T

- 100 tablets
- Methandienone
- 10 mg

**Benefits:**

- Promotes muscle gains
- Increases strength
- Supports recovery

Instructions: Take as directed, typically 1-2 tablets daily.

**3ELIGAS+**

## Pro-Anavar®

SKU: 0RA-0X50-100T

- 100 tablets
- Oxandrolone
- 50 mg

**Benefits:**

- Supports fat loss while preserving muscle
- Increases strength and endurance
- Improves recovery

Instructions: Take as directed, typically 1-2 tablets daily.

**3ELIGAS+**

## Anavar-Lite®

SKU: 0RA-0X10-100T

- 100 tablets
- Oxandrolone
- 10 mg

**Benefits:**

- Enhances muscle definition
- Supports fat loss
- Improves performance

Instructions: Take as directed, typically 1-2 tablets daily.

**3ELIGAS+**

## Pro-Primobolan®

SKU: 0RA-MA25-100T

- 100 tablets
- Methenolone Acetate
- 25 mg

**Benefits:**

- Supports lean muscle growth
- Enhances strength and recovery
- Minimal water retention

Instructions: Take as directed, typically 1-2 tablets daily.

**3ELIGAS+**

## Pro-Anadrol®

SKU: 0RA-0XY50-100T

- 100 tablets
- Oxymetholone
- 50 mg

**Benefits:**

- Promotes significant strength and muscle mass
- Enhances recovery
- Suitable for bulking cycles

Instructions: Take as directed, typically 1-2 tablets daily.

**3ELIGAS+**

## Pro-Superdrol®

SKU: 0RA-MS10-100T

- 100 tablets
- Methasterone
- 10 mg

**Benefits:**

- Supports fat loss while preserving muscle
- Increases strength and endurance
- Improves recovery

Instructions: Take as directed, typically 1-2 tablets daily.

**3ELIGAS+**

## Halotestin®

SKU: 0RA-FM10-100T

- 100 tablets
- Fluoxymesterone
- 10 mg

**Benefits:**

- Significant strength gains
- Enhances aggression and performance
- Supports lean muscle retention

Instructions: Take as directed, typically 1 tablet daily.

**3ELIGAS+**

## Creto-Proviron®

SKU: 0RA-ME20-100T

- 100 tablets
- Mesterolone
- 20 mg

**Benefits:**

- Improves libido and performance
- Supports muscle retention
- Minimal side effects

Instructions: Take as directed, typically 1 tablet daily.

3ELIGAS+

## Pro-Metribolone®

SKU: 0RA-MT5-100T

- 100 tablets
- Methyltrienolone
- 5 mg

### Benefits:

- Increases muscle mass significantly
- Enhances strength and endurance
- Supports cutting cycles

Instructions: Take as directed, typically 1 tablet daily.

3ELIGAS+

## Apto-Turinabol®

SKU: 0RA-CDMT10-100T

- 100 tablets
- Chlorodehydromethyltestosterone
- 10 mg

### Benefits:

- Enhances muscle mass
- Supports strength gains
- Minimal water retention

Instructions: Take as directed, typically 1-2 tablets daily.

3ELIGAS+

## Testosterone Undecanoate®

SKU: 0RA-TU40-100T

- 100 tablets
- Testosterone Undecanoate
- 40 mg

### Benefits:

- Promotes muscle growth and strength
- Supports overall well-being
- Enhances recovery

Instructions: Take as directed, typically 1-2 tablets daily.

# Others

The "Others for Oral" category includes a variety of supplements and medications that are taken by mouth for different health and wellness purposes. These products can range from peptides and hormonal treatments to acne medications. Each product is designed to address specific health concerns and should be used under medical supervision to ensure safety and effectiveness.

**3ELIGAS+**

## BPC 157<sup>®</sup>

SKU: 0RA-BPC157-100T

- 100 tablets
- Body Protection Compound 157 (BPC 157)
- 500 mcg
- Active Half-Life: Approximately 48 hours

Benefits: Promotes healing and tissue repair, reduces inflammation, supports gastrointestinal health

Instructions: Typically 200-800 mcg per day, administered orally or via injection. Dosage should be determined by a healthcare professional based on individual needs and response.

**3ELIGAS+**

## Etho<sup>®</sup> BPC-157 with SNAC

SKU: 0RA-SNAC0.5-100T

- 100 tablets
- Body Protective Compound 157, Salcaprozate Sodium
- 0.5 mg

Instructions: Take 1 tablet twice daily or as directed by your or as directed by your healthcare practitioner.

**3ELIGAS+**

## Iso-Accutane<sup>®</sup>

SKU: 0RA-IS020-100T

- 100 tablets
- Isotretinoin
- 20 mg
- Active Half-Life: Approximately 10-20 hours

Benefits: Treats severe acne by reducing oil gland size, decreasing oil production, and preventing clogged pores

Instructions: Typically prescribed in oral capsules, taken once or twice daily with meals. Treatment duration is usually 15-20 weeks, and it should be taken under strict medical supervision due to potential side effects and teratogenicity.

**3ELIGAS+**

## Pheno<sup>®</sup> T3 (Liothyronine Sodium)

SKU: 0RA-T3LI025-100T

- 100 tablets
- Liothyronine Sodium (T3)
- 25 mcg
- Inactive Ingredients: Rice Powder, Microcrystalline Cellulose, Vegetable Capsule (Hypromellose)

Instructions:

- Dosage: 25 mcg (1 tablet)
- Frequency: Once daily, or as directed by your healthcare provider
- Administration Method: Oral
- Duration: As prescribed by your healthcare provider

# hGH & hCG

hGH (Human Growth Hormone) and hCG (Human Chorionic Gonadotropin) are used for various medical and performance-enhancing purposes. hGH is known for its ability to promote muscle growth, fat loss, and overall well-being, while hCG is used to stimulate testosterone production and support fertility. Pens offer a convenient and precise method of administration.

# hGH & hCG

hGH is available in both pen and vial forms to cater to various medical treatments and preferences.

**3ELIGAS+**

## HCG

SKU: HGH-HCG10000-1V (10000 IU)  
HGH-HCG5000-1V (5000 IU)

- 2 vials (2 mL powder and 3 mL bacteriostatic water)

Benefits:

- Stimulates testosterone production.

Instructions:

- Dosage and cycle length depend on individual needs and goals.
- Consult a healthcare professional for personalized recommendations.

**3ELIGAS+**

## HGH

SKU: HGH-SOM191AA-10IU-2V

- 2 vials (2 mL powder and 3 mL bacteriostatic water)
- HGH (10 IU)
- 10 IU

Benefits:

- Enhances muscle growth.
- Boosts metabolism.
- Improves recovery times.

Instructions:

- Dosage and cycle length depend on individual needs and goals.
- Consult a healthcare professional for personalized recommendations.

# hGH

hGH is available in both pen and vial forms to cater to various medical treatments and preferences.

## Beltropin 10x10 IU

SKU: HGH-BT100-10V

- 10 vials
- HGH (100 iu)
- 100 iu

### Benefits:

- Promotes muscle growth.
- Enhances fat loss.
- Supports overall well-being.

### Instructions:

- Dosage and cycle length depend on individual needs and goals.
- Consult a healthcare professional for personalized recommendations.

## Beltropin® Ezuse 36 IU

SKU: HGH-EZ36-1P

- Pen
- HGH (36 iu)
- 36 iu

### Benefits:

- Promotes muscle growth.
- Enhances fat loss.
- Supports overall well-being.

### Instructions:

- Dosage and cycle length depend on individual needs and goals.
- Consult a healthcare professional for personalized recommendations.

# Peptide & Hormone Sets

(Lyophilized Powder + Bac Water)

Peptide & Hormone Sets (Lyophilized Powder + Bac Water) Our Peptide & Hormone Sets offer a convenient combination of one vial containing lyophilized (freeze-dried) powder and one vial of bacteriostatic water. These sets are designed for easy reconstitution, providing high-quality peptides and hormones for various purposes, including research, bodybuilding, and therapeutic applications. The lyophilized powder ensures product stability and effectiveness until mixed with the included bac water.

**3ELIGAS+**

## AOD9604

SKU: PEPT-A0D2-2MV

- Count : 2 mL vial + 3 mL bacteriostatic water vial
- Dosage : 2 mg

### Benefits:

- Promotes fat loss
- Increases metabolism
- Preserves lean muscle mass
- Enhances recovery

Instructions: Administer via subcutaneous injection.  
Recommended dosage is 1-2 times daily for 4-12 weeks.

**3ELIGAS+**

## CJC 1295 no DAC

SKU: PEPT-CJC5-2MV (5 mg)  
PEPT-CJC2-2MV (2 mg)

- Count : 2 mL vial + 3 mL bacteriostatic water vial

### Benefits:

- Increases muscle mass
- Improves recovery
- Enhances body composition
- Improves sleep patterns

Instructions: Administer via subcutaneous injection.  
Recommended dosage is 1-2 times daily for 4-12 weeks.

**3ELIGAS+**

## CJC 1295 DAC

SKU: PEPT-CJC5D-2MV (5 mg)  
PEPT-CJC2D-2MV (2 mg)

- Count : 2 mL vial + 3 mL bacteriostatic water vial

### Benefits:

- Sustained release of growth hormone
- Enhances muscle growth
- Supports fat loss
- Enhances recovery

Instructions: Administer via subcutaneous injection.  
Recommended dosage is 1-2 times weekly.

**3ELIGAS+**

## GHRP-6

SKU: PEPT-GHRP6-5MG

- Count : 2 mL vial + 3 mL bacteriostatic water vial
- Dosage : 5 mg

### Benefits:

- Increases growth hormone secretion
- Boosts muscle mass
- Enhances fat loss
- Stimulates appetite

Instructions: Administer via subcutaneous injection.  
Recommended dosage is 1-3 times daily, ideally 30 minutes before meals.

## GHRP-2

SKU: PEPT-GHRP2-5MG

- Count : 2 mL vial + 3 mL bacteriostatic water vial
- Dosage : 5 mg

### Benefits:

- Promotes fat loss
- Increases lean muscle
- Improves recovery times
- Enhances overall well-being

Instructions: Administer via subcutaneous injection. Recommended dosage is 1-3 times daily, typically before meals.

## Pheno<sup>®</sup> GHK-Cu

SKU: PEPT-GHK50-10M

- Count : 10 mL vial
- Dosage : 50 mg

### Benefits:

- Improves skin elasticity
- Accelerates wound healing
- Reduces inflammation
- Enhances overall skin health

Instructions: Administer via subcutaneous or intradermal injection. Recommended dosage is 1-2 times daily.

## HGH Fragment

SKU: PEPT-HGHF2-2MV (2 mg)

PEPT-HGHF5-2MV (5 mg)

PEPT-HGHF10-2MV (10 mg)

- Count : 2 mL vial + 3 mL bacteriostatic water vial

### Benefits:

- Targets fat loss
- Supports lean muscle retention
- Improves recovery times

Instructions: Administer via subcutaneous injection. Recommended dosage is 1-2 times daily.

## Ipamorelin

SKU: PEPT-IPA2-2MV (2 mg)  
 PEPT-IPA5-2MV (5 mg)  
 PEPT-IPA10-2MV (10 mg)

• Count : 2 mL vial + 3 mL bacteriostatic water vial

### Benefits:

- Increases growth hormone levels
- Supports muscle gain
- Reduces body fat
- Improves recovery times

Instructions: Administer via subcutaneous injection.

Recommended dosage is 1-3 times daily, typically before meals.

## MGF 2MG

SKU: PEPT-MGF2-2MV

- Count : 2 mL vial + 3 mL bacteriostatic water vial
- Dosage : 2 mg

### Benefits:

- Promotes muscle regeneration
- Increases muscle mass
- Enhances recovery
- Supports metabolic health

Instructions: Administer via subcutaneous injection.

Recommended dosage is 1-2 times weekly.

## PEG-MGF 2MG

SKU: PEPT-PEGMGF2-2MV

- Count : 2 mL vial + 3 mL bacteriostatic water vial
- Dosage : 2 mg

### Benefits:

- Stimulates muscle repair
- Enhances muscle growth
- Improves recovery
- Supports overall muscle health

Instructions: Administer via subcutaneous injection.

Recommended dosage is 1-2 times weekly.

## Hexarelin

SKU: PEPT-HEX2-2MV (2 mg)  
 PEPT-HEX5-2MV (5 mg)

- Count : 2 mL vial + 3 mL bacteriostatic water vial

### Benefits:

- Increases growth hormone levels
- Enhances muscle growth
- Enhances recovery
- Improves overall well-being

Instructions: Administer via subcutaneous injection.

Recommended dosage is 1-3 times daily.

## Tesamorelin 2MG

SKU: PEPT-TESA2-2MV

- Count : 2 mL vial + 3 mL bacteriostatic water vial
- Dosage : 2 mg

### Benefits:

- Promotes fat loss
- Increases growth hormone levels
- Supports lean muscle retention
- Improves energy levels

Instructions: Administer via subcutaneous injection.  
Recommended dosage is 1-2 times daily.

## Sermorelin

SKU: PEPT-SER2-2MV (2 mg)  
PEPT-SER5-2MV (5 mg)

- Count : 2 mL vial + 3 mL bacteriostatic water vial

### Benefits:

- Stimulates endogenous growth hormone release
- Enhances muscle growth
- Aids in recovery
- Improves body composition

Instructions: Administer via subcutaneous injection.  
Recommended dosage is 1-2 times daily.

## TB-500

SKU: PEPT-TB500-2MG (2 mg)  
PEPT-TB500-5MG (5 mg)  
PEPT-TB500-10MG (10 mg)

- Count : 2 mL vial + 3 mL bacteriostatic water vial

### Benefits:

- Accelerates wound healing
- Reduces inflammation
- Improves flexibility

Instructions: Administer via subcutaneous injection.  
Recommended dosage is 1-2 times weekly.

**3ELIGAS+**

## PT-141 10MG

SKU: PEPT-PT141-10MG

- Count : 2 mL vial + 3 mL bacteriostatic water vial
- Dosage : 10 mg

### Benefits:

- Increases sexual desire
- Enhances sexual performance
- Improves mood
- May aid in weight loss

Instructions: Administer via subcutaneous injection.  
Recommended dosage is 1-2 times weekly, as needed.

**3ELIGAS+**

## IGF-1LR3

SKU: PEPT-IGF1LR3-1MG (1 mg)  
PEPT-IGF1LR3-100MCG (100 mcg)

- Count : 2 mL vial + 3 mL bacteriostatic water vial

### Benefits:

- Stimulates muscle growth
- Aids in fat loss
- Supports fat loss
- Improves athletic performance

Instructions: Administer via subcutaneous injection.  
Recommended dosage is 1-2 times daily.

**3ELIGAS+**

## IGF DES 1MG

SKU: PEPT-IGFDES-1MG

- Count : 2 mL vial + 3 mL bacteriostatic water vial
- Dosage : 1 mg

### Benefits:

- Stimulates muscle growth
- Aids in tissue repair
- Enhances metabolic function
- Improves recovery times

Instructions: Administer via subcutaneous injection.  
Recommended dosage is 1-2 times daily.

**3ELIGAS+**

## DES(1-3) 1MG

SKU: PEPT-IGFDES13-1MG

- Count : 2 mL vial + 3 mL bacteriostatic water vial
- Dosage : 1 mg

### Benefits:

- Promotes muscle hypertrophy
- Supports recovery
- Enhances metabolic processes
- Improves body composition

Instructions: Administer via subcutaneous injection.  
Recommended dosage is 1-2 times daily.

## Epithalon

SKU: PEPT-EPIT10-2MV (10 mg)  
 PEPT-EPIT5-2MV (5 mg)  
 PEPT-EPIT50-2MV (50 mg)

• Count : 2 mL vial + 3 mL bacteriostatic water vial

### Benefits:

- Supports anti-aging
- Supports longevity
- Improves immune function

Instructions: Administer via subcutaneous injection.  
 Recommended dosage is 1-2 times daily for 10-20 days.

## BPC 157

SKU: PEPT-BPC157-5MG  
 PEPT-BPC157-2MG

• Count : 2 mL vial + 3 mL bacteriostatic water vial

### Benefits:

- Accelerates healing of injuries
- Reduces inflammation
- Supports gut health
- Improves recovery times

Instructions: Administer via subcutaneous injection.  
 Recommended dosage is 1-2 times daily.

## Selank

SKU: PEPT-SEL5-2MV (5 mg)  
 PEPT-SEL10-2MV (10 mg)

• Count : 2 mL vial + 3 mL bacteriostatic water vial

### Benefits:

- Reduces anxiety
- Enhances cognitive function
- Supports emotional well-being

Instructions: Administer via subcutaneous injection.  
 Recommended dosage is 1-2 times daily.

## DSIP 2MG

SKU: PEPT-DSIP2-2MV

- Count : 2 mL vial + 3 mL bacteriostatic water vial
- Dosage : 2 mg

### Benefits:

- Improves sleep quality
- Reduces stress levels
- Enhances mood
- Supports overall well-being

Instructions: Administer via subcutaneous injection.  
Recommended dosage is 1-2 times daily before bedtime.

## Oxytocin

SKU: PEPT-0XY5-2MV (5 mg)  
PEPT-0XY2-2MV (2 mg)

- Count : 2 mL vial + 3 mL bacteriostatic water vial

### Benefits:

- Enhances emotional bonding
- Reduces stress
- Supports social interactions
- Improves mood

Instructions: Administer via subcutaneous injection.  
Recommended dosage is 1-2 times daily, as needed for emotional support.

## FTPP 2MG

SKU: PEPT-FTPP2-2MV

- Count : 2 mL vial + 3 mL bacteriostatic water vial
- Dosage : 2 mg

### Benefits:

- FTPP aka Fat-Targeted Proapoptotic Peptide
- Supports overall health
- Enhances metabolic function
- Promotes well-being
- Aids in recovery

Instructions: Administer via subcutaneous injection.  
Recommended dosage is 1-2 times weekly.

## Follistatin-344 1MG

SKU: PEPT-FOLL1-2MV

- Count : 2 mL vial + 3 mL bacteriostatic water vial
- Dosage : 1 mg

### Benefits:

- Increases muscle mass
- Reduces muscle wasting
- Enhances recovery
- Supports athletic performance

Instructions: Administer via subcutaneous injection.  
Recommended dosage is 1-2 times weekly.

## Gonadorelin 2MG

SKU: PEPT-GONA2-2MV

- Count : 2 mL vial + 3 mL bacteriostatic water vial
- Dosage : 2 mg

### Benefits:

- Supports reproductive health
- Enhances hormone production
- Promotes fertility
- Aids in muscle growth

Instructions: Administer via subcutaneous injection. Recommended dosage is 1-2 times daily based on medical advice.

## MYO 1MG

SKU: PEPT-MYO1-2MV

- Count : 2 mL vial + 3 mL bacteriostatic water vial
- Dosage : 1 mg

### Benefits:

- Promotes muscle hypertrophy
- Supports recovery
- Enhances metabolic function
- Improves athletic performance

Instructions: Administer via subcutaneous injection. Recommended dosage is 1-2 times weekly.

## Triptorelin 2MG

SKU: PEPT-TRIP2-2MV

- Count : 2 mL vial + 3 mL bacteriostatic water vial
- Dosage : 2 mg

### Benefits:

- Regulates reproductive hormones
- Supports fertility
- Helps in hormone balance
- Aids in muscle retention

Instructions: Administer via subcutaneous injection. Recommended dosage is based on specific protocols for hormone therapy.

## Melanotan MT-1 10MG

SKU: PEPT-MT1-10MG

- Count : 2 mL vial + 3 mL bacteriostatic water vial
- Dosage : 10 mg

### Benefits:

- Increases melanin production
- Enhances sexual desire
- Supports weight loss
- Improves mood

Instructions: Administer via subcutaneous injection. Recommended dosage is 1-2 times weekly, starting with a lower dose and increasing as needed.

3ELIGAS+

## Melanotan MT-2 10MG

SKU: PEPT-MT2-10MG

- Count : 2 mL vial + 3 mL bacteriostatic water
- Dosage : 10 mg

### Benefits:

- Increases melanin production
- Enhances sexual desire
- Supports weight loss
- Improves mood

Instructions: Administer via subcutaneous injection. Recommended dosage is 1-2 times weekly, starting with a lower dose and increasing as needed.

3ELIGAS+

## Semaglutide 5MG

SKU: PEPT-SEM5-2MV

- Count : 2 mL vial + 3 mL bacteriostatic water vial
- Dosage : 5 mg

### Benefits:

- Supports weight loss
- Regulates blood sugar levels
- Reduces appetite
- Enhances metabolic function

Instructions: Administer via subcutaneous injection. Recommended dosage is 1 time weekly.

3ELIGAS+

## Tirzepatide

SKU: PEPT-TIR5-2MV (5 mg)

PEPT-TIR10-2MV (10 mg)

- Count : 2 mL vial + 3 mL bacteriostatic water vial

### Benefits:

- Aids in weight loss
- Improves blood sugar control
- Reduces appetite
- Enhances metabolic function

Instructions: Administer via subcutaneous injection. Recommended dosage is 1 time weekly.

3ELIGAS+

## HMG 75iu

SKU: PEPT-HMG75

- Count : 2 mL vial + 3 mL bacteriostatic water vial
- Dosage : 75 IU

### Benefits:

- Stimulates melanin production
- Enhances sexual performance
- Supports weight management
- Improves mood

Instructions: Administer via subcutaneous injection.  
Recommended dosage is 1-2 times weekly.

3ELIGAS+

## Tirzepatide GLP-1/GIP

SKU: PEPT-TIR5-2MV-NBW (5 mg)

PEPT-TIR10-2MV-NBW (10 mg)

- Count : 2 mL vial

### Benefits:

- Aids in weight loss.
- Improves insulin sensitivity.
- Helps regulate blood sugar levels.
- Enhances overall well-being.

Instructions: Suitable for those seeking gradual weight loss and metabolic improvement.

# Weight Loss

---

Weight loss supplements can help support the reduction of body fat, increase metabolism, and improve overall health. They may include various compounds that suppress appetite, enhance fat oxidation, and improve energy levels. It's important to use them responsibly and under medical supervision.

# Semaglutide and Tirzepatide Pens

are convenient options for managing type 2 diabetes and obesity, offering precise dosing and ease of use.

## Belzempic<sup>®</sup> Ezuse (Semaglutide Pens)

Belzempic<sup>®</sup> is a GLP-1 receptor agonist designed to manage type 2 diabetes and support weight loss effectively.

### Dosages:

Available in multiple dosages to suit individual needs.

Belzempic <sup>®</sup> Ezuse SKU	Dose (mg)	Color	Volume per Dose (mL)	Total volume of each pen	Contains number of Needles
HGH-SEM2-1P	2 mg	Green	0.25 mg/0.5 mg	1.0 mL (4 doses)	6
HGH-SEM4-1P	4 mg	Blue	1 mg	1.0 mL (4 doses)	4
HGH-SEM8-1P	8 mg	Deep Purple	2 mg	2.0 mL (4 doses)	4

*Each pen provides the specified dosage and is equipped with the number of needles.  
The needle gauge is 32G, and the length is 4mm suitable for skin injection.*

### How to Use:

The Belzempic<sup>®</sup> pen offers a user-friendly autoinjector for weekly subcutaneous injections. It can be administered in the stomach, thigh, or upper arm.

**BELIGAS** 

*Includes needles for straightforward and convenient injections.*

# Beljaro<sup>®</sup> Ezuse (Tirzepatide Pens)

Beljaro<sup>®</sup> is a revolutionary dual GLP-1 and GIP receptor agonist for managing type 2 diabetes and promoting weight loss.

## How to Use:

The Beljaro<sup>®</sup> pen is designed for ease of use, offering a weekly subcutaneous injection that can be administered in the stomach, thigh, or upper arm.

## Dosages:

Available in various dosages to cater to different treatment plans.

Beljaro <sup>®</sup> Ezuse SKU	Dose (mg)	Color	Volume per Dose (mL)	Total volume of each pen	Contains number of Needles
HGH-Y-PEN-TIR2.5-4N	2.5 mg	Yellow	0.6 mL	2.4 mL (4 doses)	4
HGH-B-PEN-TIR5-4N	5 mg	Blue	0.6 mL	2.4 mL (4 doses)	4
HGH-G-PEN-TIR7.5-4N	7.5 mg	Green	0.6 mL	2.4 mL (4 doses)	4
HGH-O-PEN-TIR10-4N	10 mg	Orange	0.6 mL	2.4 mL (4 doses)	4
HGH-P-PEN-TIR12.5-4N	12.5 mg	Purple	0.6 mL	2.4 mL (4 doses)	4
HGH-R-PEN-TIR15-4N	15 mg	Red	0.6 mL	2.4 mL (4 doses)	4

*Each pen provides the specified dosage and is equipped with the number of needles. The needle gauge is 32G, and the length is 4mm suitable for skin injection.*

**BELIGAS**

*Supplied with needles for easy and convenient injections.*

**BELIGAS**+

## Pro-Tesofensine®

SKU: 0RA-TSF250-100T

- 100 tablets
- Tesofensine
- 250 mcg
- Active Half-Life: Approximately 9 hours

Benefits: Appetite suppression, increased metabolism, improved cognitive function, potential blood sugar regulation

Instructions: Typically starts at 0.25 mg, with potential increases up to 1 mg based on individual response and medical advice. Usually taken in cycles of 2-4 weeks, followed by a break.

**BELIGAS**+

## Pro-Clenbuterol®

SKU: 0RA-CLB40-100T

- 100 tablets
- clenbuterol
- 40 mcg
- Active Half-Life: Approximately 36 hours

Benefits:

- Increases metabolic rate
- Promotes fat loss
- Enhances athletic performance

Instructions: Typically 20-40 mcg per day, but should be adjusted based on individual response and medical advice. Usually taken in cycles of 2-4 weeks, followed by a break.

**BELIGAS**+

## Helio® Clenbuterol

SKU: 0RA-CLEN20-100T

- 100 tablets
- Clenbuterol Hydrochloride
- 20 mcg
- Inactive Ingredients: Rice Powder, Microcrystalline Cellulose, Vegetable Capsule (Hypromellose)

Instructions:

- Dosage: 20 mcg (1 tablet)
- Frequency: Once daily
- Administration Method: Oral
- Duration: As directed by your healthcare provider; do not exceed recommended dose.

## Cytomel-T3<sup>®</sup>

SKU: 0RA-LT50-100T

- 100 tablets
- liothyronine sodium
- 50 mcg
- Active Half-Life: Approximately 2.5 days

### Benefits:

- Increased metabolism
- Energy enhancement

Instructions: Typically starts at 5-10 mcg per day, but can be adjusted based on individual response and medical advice.

---

3ELIGAS+

## Levothyroxine-T4<sup>®</sup>

SKU: 0RA-LV100-100T

- 100 tablets
- levothyroxine sodium
- 100 mcg
- Active Half-Life: Approximately 7 days

### Benefits:

- Supports fat loss
- May enhance metabolic health
- Improves overall energy levels

Instructions: Typically starts at a low dose and is gradually increased based on individual response and medical advice.

---

3ELIGAS+

## 5-Amino 1MQ<sup>®</sup>

SKU: 0RA-5A1MQ50-100T

- 100 tablets
- 5-Amino-1-Methylquinolinium
- 50 mg
- Active Half-Life: N/A

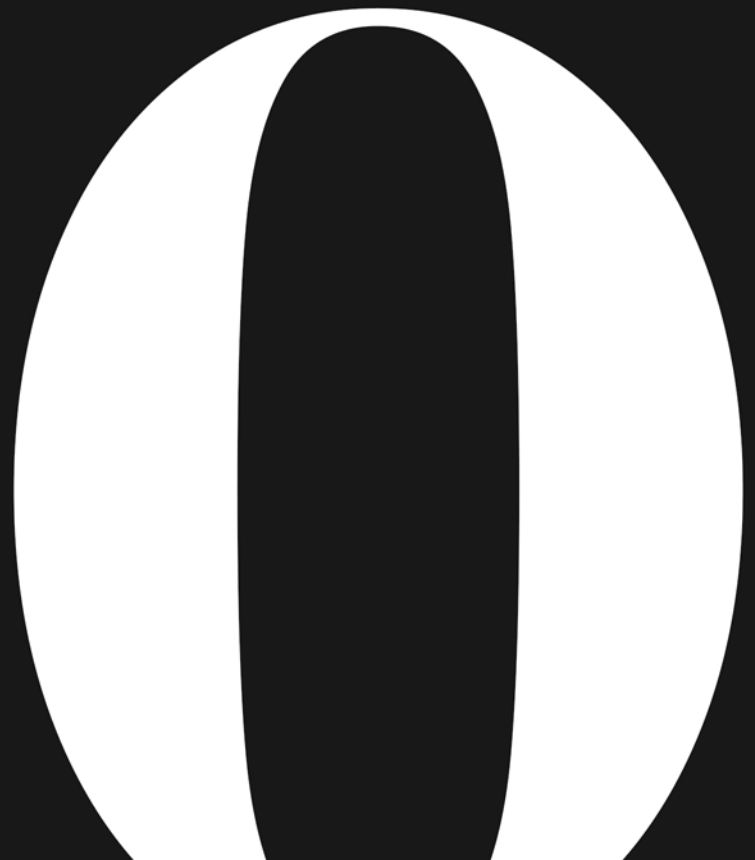

### Benefits:

- Supports fat loss
- May enhance metabolic health
- Improves overall energy levels

Instructions: Typically 250 mg per day, but should be adjusted based on individual response and medical advice.

## Miscellaneous

The "Miscellaneous" category includes a unique range of products from Beligas Pharmaceuticals designed to meet various health and wellness needs. From essential medical supplies to innovative hair care solutions, these products highlight Beligas' commitment to quality, effectiveness, and user satisfaction. Each item in this category is crafted with precision and care, ensuring top-tier performance for your health and lifestyle requirements.

# Accessory

This package includes sterile water solution containing bacteriostatic medication for injections, packaged alcohol swabs for skin cleaning, and a larger package for regular use in healthcare environments.

**3ELIGAS+**

## Bacteriostatic Water

SKU: MISC-ACC-BW30M

- 30 mL in a multidose vial
- Benzyl alcohol (preservative)

Benefits: Inhibits bacterial growth, used to dilute or dissolve medications for injection

Instructions: Used to reconstitute medications; typically mixed with powdered drugs before injection

**3ELIGAS+**

## 70% Alcohol Pads

SKU: MISC-ACC-AS50P (50 pads)  
MISC-ACC-AS100P (100 pads)

- 70% isopropyl alcohol

Benefits: Disinfects skin and surfaces, sterilizes injection sites

Instructions: Used to clean and disinfect the skin before injections, or to sanitize surfaces and equipment

# Liver Protections

ORA-TUDCA90-10T is a liver protection supplement designed to support liver health and function. TUDCA, the active ingredient, is a bile acid naturally found in the body that helps improve bile flow, reduce liver enzyme levels, and protect liver cells from damage caused by toxins and oxidative stress.

## TUDCA

SKU: ORA-TUDCA90-10T

- 90 tablets
- Tauroursodeoxycholic acid (TUDCA)
- 450-1500 mg/week

### Benefits:

- Protects liver cells from damage
- Supports bile flow and digestion
- Promotes detoxification processes
- May improve insulin sensitivity

Instructions: Take 1-2 tablets daily with meals or as directed by a healthcare professional.

**3ELIGAS+**

# Hair Care

The topical remedy, containing finasteride and dutasteride, is designed to reduce male hair loss by inhibiting androgens from affecting hair follicles, providing an additional option for those seeking hair loss prevention.

**3ELIGAS+**

## Beljaro® ReNew

SKU: MISC-HAIR-FIND1-60M

- 0.1% Finasteride (1 mg per 1 mL)
- Treats androgenic alopecia by inhibiting DHT conversion

### Features:

- Fast-drying and non-greasy formula
- Easy dropper application
- Suitable for both men and women

**3ELIGAS+**

## Beljaro® ReVival

SKU: MISC-HAIR-DUT01-60M

- 0.1% Dutasteride (1 mg per 1 mL)
- Treats androgenic alopecia by inhibiting DHT conversion

### Features:

- Fast-drying and non-greasy formula
- Easy dropper application
- Suitable for both men and women

**3ELIGAS+**

## Beljaro® ReGrowth

SKU: MISC-HAIR-RU588-30M

- RU58841 (5% concentration)
- Stimulates hair regrowth

### Features:

- Convenient roll-on massager for application
- Suitable for both men and women

**3ELIGAS+**

## Quant® Minoxidil

SKU: MISC-MIN2.5-100T (2.5 mg)  
MISC-MIN5-100T (5 mg)

100 Tablets

Active Ingredients:

- Minoxidil 2.5 mg
- Minoxidil 5 mg

Benefits:

- Promotes hair growth
- Treats hair loss

Dosage:

- 1 tablet daily
